

GDCB SEMINARS

Tuesdays at 1 p.m.

1414 Molecular Biology Building

Spring 2023

January 17	Larry York Oak Ridge National Laboratory	Topic — Root physiology and phenotyping <i>Host: Dior Kelley</i>
January 31	Raquel Espin Palazon Iowa State University	Topic — Uncovering inflammatory dynamics during developmental hematopoiesis <i>Host: Jeff Essner</i>
February 7	Dave Jackson Cold Spring Harbor Laboratory	Topic — Cell signaling in plant growth and development <i>Hosts: Erik Vollbrecht/Joe Aung</i>
February 14	Manisha Munasinghe University of Minnesota, St. Paul	Topic — Transposons and genome variation in maize <i>Promising Scientist Series speaker</i> <i>Host: Marna Yandea-Nelson</i>
February 21	Damon Lisch Purdue University	Topic — Transposable element genetics in maize <i>Host: Sarah Anderson</i>
February 28	Hyun-Min Jung University of Illinois at Chicago	Topic — Vascular development and function <i>Host: Chelsea Cheng, GDCB Graduate Student Postdoc Organization</i>
March 7	Kayla Bayless Texas A&M University	Topic — Endothelial activation <i>Host: Jeff Essner</i>
March 14	Spring break	
March 21	Irfan Lodhi Washington University School of Medicine	Topic — Peroxisome and mitochondria in mouse adipose tissue <i>Host: Hua Bai</i>
March 28	Lilian Kabeche Yale University	Topic — Chromosome instability, DNA damage repair, cancer <i>Host: GDCB DEI Committee</i>
April 4	Michael Tomasson University of Iowa	Topic — Blood cancers and bone marrow transplantation <i>Host: Raquel Espin Palazon</i>
April 11	Andrea Gallavotti Rutgers, the State University of New Jersey	Topic — Auxin and maize <i>Host: Dior Kelley</i>
April 18	Owen Tamplin University of Wisconsin, Madison	Topic — The hematopoietic stem cell microenvironment <i>Host: Clyde Campbell</i>
April 25	Jacob Brunkard University of Wisconsin, Madison	Topic — TOR signaling in plants <i>Host: Joe Aung</i>
May 2	Alice Cheung University of Massachusetts, Amherst	Topic — Pollen-pistil interaction: a long and winding road to fertilization <i>Host: Hongqing (Michelle) Guo</i>

IOWA STATE UNIVERSITY

Department of Genetics, Development and Cell Biology
