GDCB Seminar Schedule
Fall 2018

Aug. 28 Cheryl Rosenfeld
University of Missouri
Topic — placental structure
(Host: Geetu Tuteja)

Sept. 11 Bruce Goode
Brandeis University
Topic — microtubules and actin
(Host: Moe Gupta)

Sept. 18 Rebecca Roston
University of Nebraska-Lincoln
Topic — membrane remodeling
(Host: Marna Yandeau-Nelson)

Sept. 25 Naoki Yamanaka
University of California, Riverside
Topic — ecdysteroids and insect development
(Host: Hua Bai)

Oct. 2* Robert Philibert
University of Iowa
Research focus — behavioral genetics
*IG Seminar Series

Oct. 9* Guanjing Hu
ISU Ecology and Evolutionary Organismal Biology
Research focus — plant evolutionary genomics
*IG Seminar Series

Oct. 23* Hong Qiao
University of Texas at Austin
Research focus — molecular biosciences
*IG Seminar Series (Host: Yanhai Yin)

Oct. 26* Krishanu Saha
University of Wisconsin
Topic — biomedical engineering
*Special Friday Seminar 4:10 p.m.
(Host: Molecular, Cellular and Developmental Biology Graduate Student Organization)

Oct. 30* Kate Meyer
Duke University
Research focus — RNA modifications
*IG Seminar Series

Nov. 6 Kerry Bloom
University of North Carolina, Chapel Hill
Topic: microtubule/spindle function
(Host: Moe Gupta)

Nov. 13 Laura Schulz
University of Missouri
Topic — early trophoblast differentiation
(Host: Geetu Tuteja)

Nov. 20 Fall Break

Nov. 27 Davit Potoyan
ISU Chemistry
Topic — theoretical chemistry and biophysics
(Host: Steve Howell)

Dec. 4 Ian Schneider
ISU Chemical and Biological Engineering
Topic — cellular and molecular mechanisms
(Host: Steve Howell)

Tuesdays at 4:10 p.m.
Room 1414, Molecular Biology Building (MBB)
