

GDCB SEMINARS

Tuesdays at 4:10 p.m.*

1414 Molecular Biology Building (MBB)

Spring 2019

Jan. 15	<u>Nicole Valenzuela</u> ISU Ecology, Evolution and Organismal Biology	Topic — evolutionary genomics (Host: Marna Yandea-Nelson)
Jan. 22	<u>Ryan Smith</u> ISU Entomology	Topic — mosquito malaria parasite interaction (Host: Dior Kelley)
Jan. 29	<u>Chi-Lien Cheng</u> University of Iowa	Topic — plant alternation of generations (Host: Steve Howell) POSTPONED UNTIL FALL 2019
Feb. 5	<u>Melissa Gardner</u> University of Minnesota	Topic — mitotic microtubule dynamics (Host: Moe Gupta)
Feb. 12	<u>Joshua Gendron</u> Yale University	Topic — plant circadian clock (Host: Joe Aung)
Feb. 19	<u>Veena Prahlad</u> University of Iowa	Topic — neuronal stress responses (Host: Hua Bai)
Feb. 26	<u>Lucia Strader</u> Washington University in St. Louis	Topic — auxin plant morphogenesis (Host: Dior Kelley)
Mar. 5	<u>Ross Sozanni</u> North Carolina State University	Topic — plant stem cells (Host: Dior Kelley)
Mar. 12	<u>Rick Vierstra</u> Washington University in St. Louis	Topic — plant proteasome systems (Host: Steve Howell)
Mar. 19	Spring Break	
Apr. 2	<u>Arshad Desai</u> University of California, San Diego	Topic — chromosome segregation (Host: Moe Gupta)
Apr. 12 *Friday	<u>Hui-Ying Lim</u> University of Oklahoma Health Sciences Center	Topic — ROS and heart function (Host: Hua Bai)
Apr. 16	<u>Isabel Molina</u> Algoma University, Ontario, Canada	Topic — protective plant lipids (Host: Marna Yandea-Nelson)
Apr. 23	<u>Guo-Liang Wang</u> The Ohio State University	Topic — plant disease resistance (Host: Joe Aung)

IOWA STATE UNIVERSITY

Department of Genetics, Development and Cell Biology
